

PROFESSIONAL SPOOLING MACHINERY

STANDARD & CUSTOM DESIGNS FOR ALL INDUSTRIES

SMALL SYSTEMS FOR SMALL VOLUMES

SINGLE STATION MACHINES

a) Pancake to Spool. b) Pancake to Spool, Spool to Pancake and Spool to Spool Salvage

MULTI-STATION "STARTER SYSTEMS"

These systems process "Pre-Slit" products and fit well with companies who are already conventionally slitting and rewinding.

PROFESSIONAL "HIGH SPEED" MULTI-STATION SYSTEMS

These are our most versatile machines which can process a wide range of materials, both adhesive or non adhesive. These machines dominate the UK Contract Spooling sector. They are modular in design and can be expanded after initial installation. The Unwind section incorporates Guiding and Slitting. Rotary Shear; Rotary Crush; and Razor Slitting cassettes are standard within this model.

PROFESSIONAL "HIGH SPEED" LARGE SPOOL SYSTEMS

"JUMBO" SPOOLING SYSTEMS

Used predominantly for low density products, these spools can be 1000 mm wide x 1200 mm diameter. Both the examples shown are very high speed 500 mpm and 600 mpm respectively. Materials processed on these machines are: Adhesive and non adhesive Foams; Water Blocking tapes; Various Non-Wovens. Both systems show Semi-Automatic Unload/Spool handling systems
